

# Update

Alev Orfi

June 15, 2017

# Materials

- Fused deposition modelling (FDM)
  - Not waterproof
  - Easily accessible
- Stereolithography
  - Waterproof
  - Expensive
- FDM and polyurethane combination

# Coanda Valves

- Allows for quick direction changes
- Much smaller deadzone than the pump
- Allows linear control of output force
  - PWM controlled

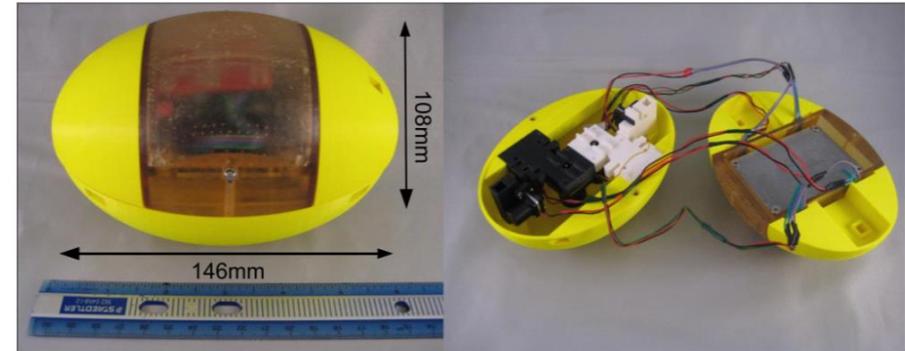

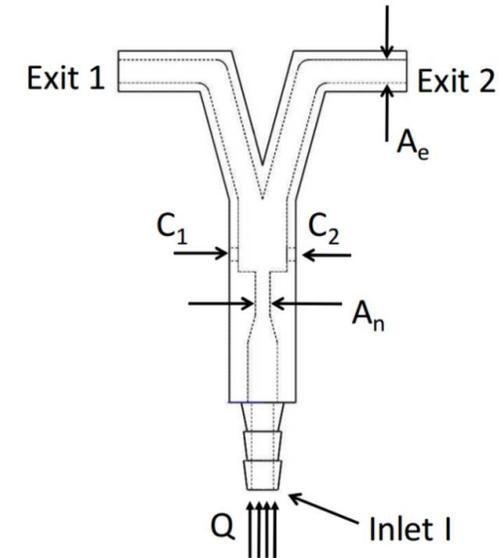

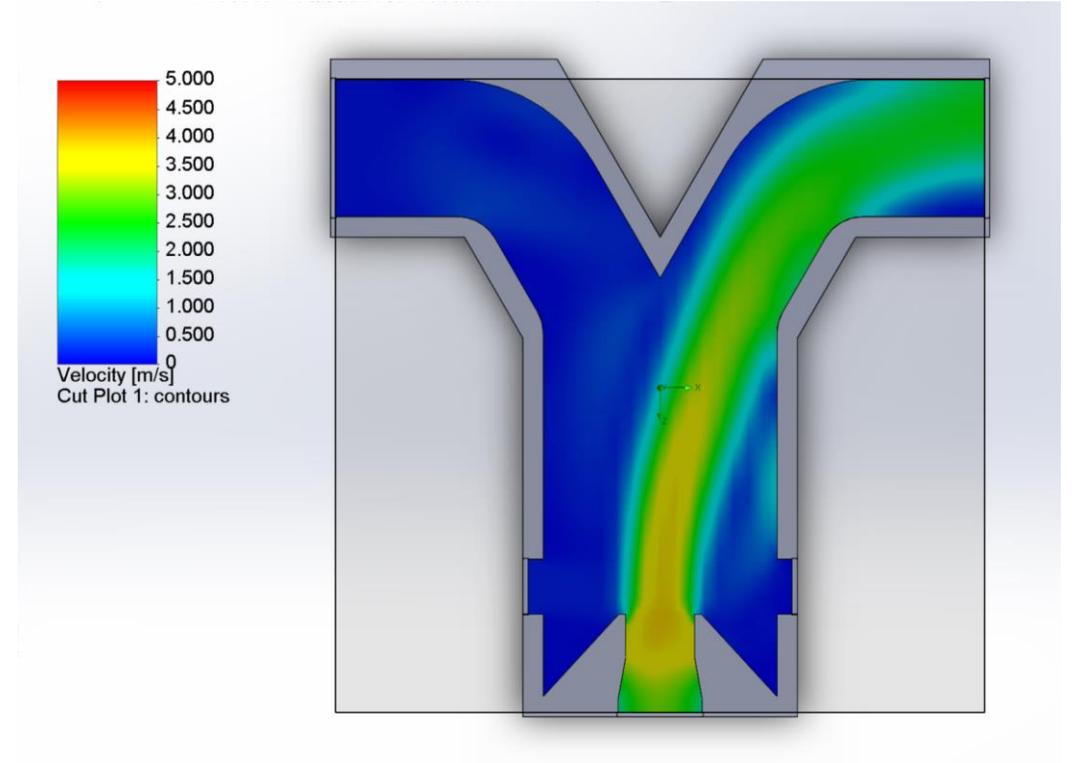

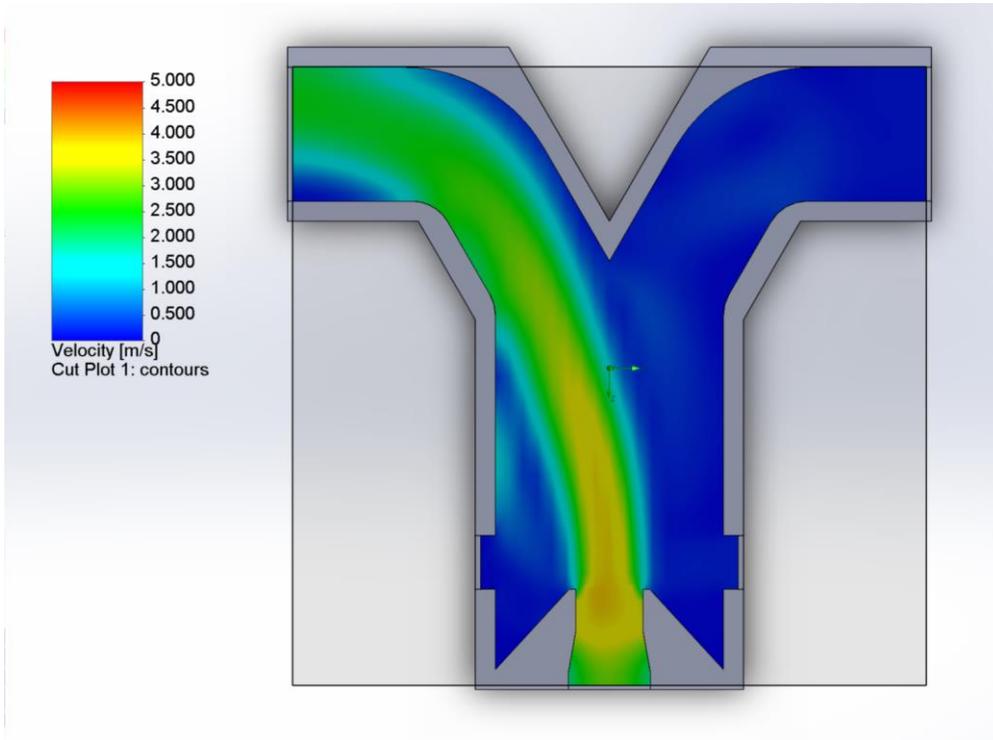

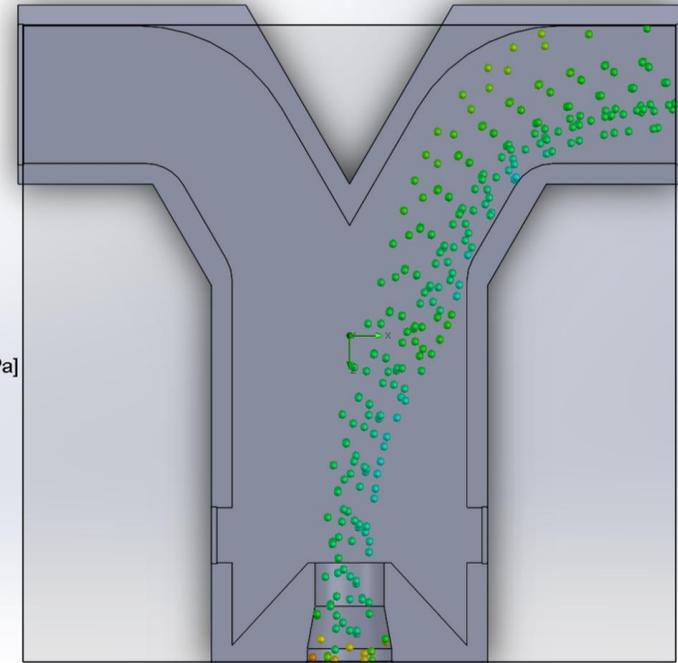

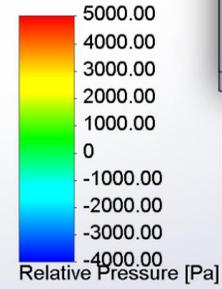

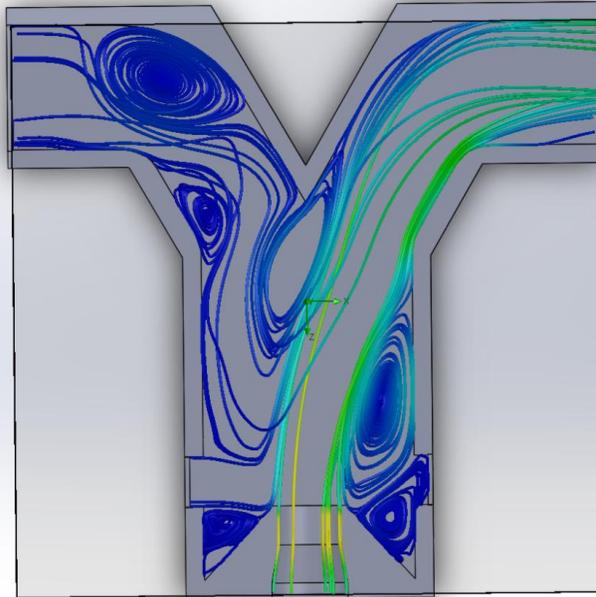

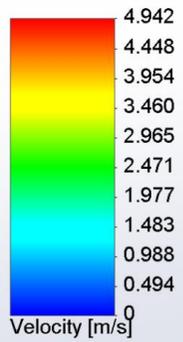

Fig. 12. Photographs of the prototype robot and its internal components.

# Velocity Cut Plots

# Flow Trajectories

# M400 Micropump

- 2.5 by 4 cm
- Free flow rate of around 2500ml/min

# General Layout

- around 14 by 8 cm
