

Progress Update

Trevor Towstego
2-Ring ν_e CC1 π^+ Meeting
November 28, 2018

v0 (trial 9) all ν_e CC as Signal

NTrees=1500, MaxDepth=7, MinNodeSize=0.05, NCuts=50

- See performance of selection when defining all ν_e CC events as signal for BDT training
- Use **v0** pre-BDT cuts with **trial 9** variables
- Check kinematic reconstruction performance

Pre-BDT cuts	
v1	v0
<ul style="list-style-type: none"> - FCFV - not 1Re/1Re1de - possible 2Repi • <u>0 de</u>: 2Reπ, 2Rπe, and 3Re$\pi\pi$ sub-samples • <u>1 de</u>: 1Re, 2Ree, 2Reπ, 2Rπe, 2Rμe, and 3Re$\pi\pi$ sub-samples - 1/2 sub-events - $E_{rec}(1e,1\pi) < 1.5$ GeV 	<ul style="list-style-type: none"> - FCFV - not 1Re/1Re1de - 1/2 sub-events - $E_{rec}(1e,1\pi) < 1.5$ GeV

	BDT variables

Here, signal defined as all ν_e CC events

ν_0 (trial 9) all ν_e CC sig: E_{rec}

0 decay e

E_{rec} by Final State Particles (after BDT)

1 decay e

E_{rec} by Final State Particles (after BDT)

$$E_\nu = \frac{m_e^2 + m_{\pi^+}^2 - 2m_N(E_e + E_{\pi^+}) + 2p_e \cdot p_{\pi^+}}{2(E_e + E_{\pi^+} - |p_e| \cos \theta_{\nu e} - |p_{\pi^+}| \cos \theta_{\nu \pi^+} - m_N)}$$

ν_0 (trial 9) all ν_e CC sig: E_ν

0 decay e

E_ν by Final State Particles (after BDT)

1 decay e

E_ν by Final State Particles (after BDT)

ν_0 (trial 9) all ν_e CC sig: E_{res}

0 decay e

E_{res} by Final State Particles (after BDT)

1 decay e

E_{res} by Final State Particles (after BDT)

Mike:

- Train 0de sample using 1e as signal, adjust E_{rec} equation accordingly
 - May see reduction in 0l $1\pi^0$ background

$$E_{\nu} = \frac{m_e^2 + m_{\pi^+}^2 - 2m_N(E_e + E_{\pi^+}) + 2p_e \cdot p_{\pi^+}}{2(E_e + E_{\pi^+} - |p_e| \cos \theta_{\nu e} - |p_{\pi^+}| \cos \theta_{\nu \pi^+} - m_N)}$$

Future Work & Thoughts

- Look at pion travel distance in relation to $\cos(\theta_{e\pi}^{\text{rec}})$, and narrow down which sub-sample(s) is/are responsible
- Get GENIE installed and start generating events with NuWro and GENIE
 - Looking at hep_ml to use BDTs for multi-dimensional MC re-weighting
 - Investigate concerns regarding over-training to NEUT
 - Adapt BDT architecture accordingly
- Possible overlap with Yoshida-san
 - She plans to start looking at systematics after the collaboration meeting
 - Discuss possible coordination next week
